

Spring Loaded Pallet Lifter

PRODUCT CODE PLLF2000

Product Description

Suited to any workplace where loading and unloading palletised goods is required. Load height is mechanically adjusted as load is increased and decreased, eliminating user strain related to bending and lifting.

The spring loaded pallet lifter is suitable for pallet weights of up to a maximum of 2000kg.

Features

- Simple, robust scissor lift mechanism
- Heavy duty compression springs with shock absorbers dampen vertical movement of load
- Built In forklift pickup channels
- Turntable Top allows load rotation
- Durable galvanised construction
- Optional Rotation Lock allows top to be secured in fixed position
- Optional Adjustable Feet for uneven surfaces and to allow pallet jack transportability
- Modifications available: Alternative springs, heavy duty castor kit
